Labs Offered

<p>Annual Check-Up Panel</p>	<p>The Annual Check-Up Panel is a great way to establish a “baseline” for your overall health. It consists of numeric values that will assess your blood counts, kidney and liver function, electrolytes, total cholesterol, triglycerides, HDL, LDL, and thyroid function</p>	<ol style="list-style-type: none"> 1. Complete Blood Count (CBC) 2. Cholesterol Lipid with Ratio (Lipids Panel) 3. Thyroid Stimulating Hormone (TSH) 4. Comprehensive Metabolic Panel (CMP) 5. Hemoglobin A1c (HbA1C) 6. Vitamin D, 25-Hydroxy
------------------------------	--	--

values. By understanding these values, you can begin to manage your own health to see if they fluctuate over time.

Hemoglobin A1C
(Diabetes Monitoring)

The Hemoglobin A1C (Diabetes Monitoring) is an exam to with a valuable measure of the overall blood glucose levels over a period (2-3 months). This test can help detect and/or diagnose diabetes.

1. Hemoglobin A1c (HbA1C)

STD Panel,
Comprehensive

STDs are also known as Sexually Transmitted Diseases or STIs, Sexually Transmitted Infections. These are infections that can be spread from person to person through sexual contact. Treatment of STDs depends on the type of infection such as Herpes, Chlamydia, gonorrhea, and syphilis. These are common conditions, and it is possible to have an STD and do not even realize it. Symptoms vary from person to person. Early detection is essential.

1. HIV (Human Immunodeficiency Virus)
2. RPR (Syphilis)
3. Herpes (HSV 1 and HSV 2)
4. Gonorrhea
5. Chlamydia
6. Hepatitis B
7. Hepatitis C

Chlamydia and
Gonorrhea

Chlamydia and
Gonorrhea are both

1. Chlamydia
2. Gonorrhea

sexual transmitted diseases that can be transmitted from person to person through sexual contact. Symptoms vary from person to person. Some persons go without any symptoms.

Blood Type and RH Factor

Blood typing and RH Factor test determines your blood type (either A, B, AB, and O) and the RH factor can be negative or positive.

3. Blood Type
4. RH Factor Test

10 Panel Drug Test (Urine)

This exam is a 10 Panel Drug Test (Urine) that will identify the presence or absence of ten (10) different classes of commonly abused or misused drugs or their metabolites. This is a routine screen to each drug class, as well as any necessary confirmation testing. This exam requires a standard urine sample that can be collected at a LabCorp near you.

1. Amphetamine/Methamphetamine
2. Barbiturates
3. Benzodiazepines
4. Cocaine
5. Marijuana
6. Methaqualone
7. Methadone
8. Opiates
9. Phencyclidine
10. Propoxyphene
